To Whom It May Concern:

Ref: Family History Research

We have spent many loving hours preserving and researching our ancestor's genealogy and life histories and would like to ensure that those histories are not lost or dispersed with time. Our wills and trusts detail how our assets are to be distributed after our deaths but there is additional material that is valuable to our families. Upon our deaths, we entrust to one another these files. At the last, it is our wish that our daughter, **Susan Ann JONES Taylor**, take possession of all files, books, pictures and related materials. This includes both **JONES** and **SMITH** subjects. We wish her to, in reasonable time, distribute the materials to the appropriate families at her discretion. This research is valuable and represents our heritage and that of our children, grandchildren and their descendants. It is our gift to those we love so that they know a bit more of the mothers and fathers that came before them.
